

ABSTRACT

A water-absorbent resin composition comprising a water-absorbent resin,
an oxygen-containing reducing inorganic salt, an aminocarboxylic acid-based
5 metal chelating agent and an organic antioxidant; an absorbent comprising the
above-mentioned water-absorbent resin composition and a hydrophilic fiber; and
an absorbent article comprising the above-mentioned absorbent interposed
between a liquid-permeable sheet and a liquid-impermeable sheet. The
water-absorbent resin composition of the present invention is used in absorbent
10 articles such as disposable diaper, sanitary napkin, and the like.
